PROCYS

Today's consumers are looking for real "home-made" products and so taste and appearance are the key factors in industrial food production. In response, PROCYS develops, designs and builds tailor-made automated industrial equipment for the food industry.
PROCYS is a manufacturer and supplier of industrial equipment specialized in the entire process for biscuits, pastry, bakery, and handles projects from the production output (oven, fryer, moulder) until the entry into the packaging machines.

Our story

A professional team at your disposal. Passionate engineers and technicians with more than 20 years of experience in the field of food production lines bring you their expertise and help you to realize your projects.

Expertise

PROCYS team is ready and able to meet your most exacting specifications with new and innovative solutions. Process control, cost control, mechanical principles, hygiene compliance and concern for ergonomics.

Innovation

Our company offers an R&D service and original solutions that will resolve production problems for which there are currently no standard systems.

Flexibility

A solution for every problem. We study your specifications and our technical team adapts standard PROCYS systems to your particular needs. You benefit from a tailor-made solution with well-established modules.

Handling

Industrial production meets the needs of productivity, quality and reliability. It is in this approach that PROCYS offers solutions for the automated management of your production flows

Handling high-speed product flows is our core business. Procys helps you in your industrialization and optimization projects of production lines.

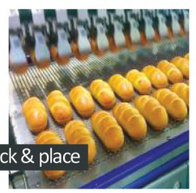
Tray loading



Pick & place

Loaders

Macaron expert

PROCYS has developed a complete process dedicated to macarons

Macarons, symbols of French pastry and delicacy, both crunchy and soft, unique in their design, are however as complex to produce as they are good. Procys is THE specialist to help you to automate all or part of your production process. With decades of experience, our sales and technical team is composed of experts who help you in the industrialization of your process.

Why our process?

- Keep your traditional recipes
- Save manual operations
- Ergonomic workstations
- More consistent and accurate
- Increase your production
- Simplify your process
- Save your time / save your money

3 types of dosing and assembling machines

CAPPER S

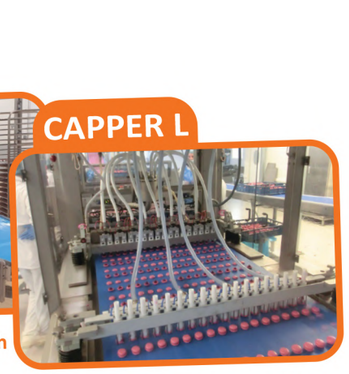
Up to 2 400 p/h

Manual feeding

CAPPER M

From 7 200 to 14 400 p/h

Direct feeding from cooking trays



CAPPER L

From 21 600 to 30 000 p/h

Automatic feeding from continuous oven tunnel

Fields of competence

Biscuits cookies

Macarons

Pastry

Confectionery

«LET'S DEFINE TOGETHER
THE SOLUTION THAT MEET YOUR NEEDS»

PROCYS

Spare parts & preventive maintenance

Discover our preventive maintenance, express repair, and spare parts services for food processing machinery. We support you to maximize the reliability of your equipment, optimize its productivity, and ensure its compliance with food processing standards.

Extend the lifespan of your machinery with regular inspections and timely repairs, reducing downtime.
Improve the safety and performance of your equipment while meeting the requirements of the food processing industry.

Let's build together

From the beginning of your project, we take into account the particularities of your request and build together, from our already proven principles and modules, a suitable, reliable, simple and efficient solution that will meet your needs.

Procys continues its international strategy by developing its network of agents and partners abroad in order to ensure maximum presence in the field. The Procys technical and sales team is structured in such a way as to be able to meet your needs in Europe and worldwide. With a constantly growing turnover, export already represents more than 50% of our projects.
